

eBILLINGHUB ENHANCED FUNCTIONALITY

WITH eBILLINGHUB ENHANCEMENTS YOU CAN:

- Have more flexible access to your clients' billing guidelines
- Integrate invoice status updates with your time and billing system
- Access data to create and customize your own invoicing reports
- Deliver and track PDF invoices, including available integrations to help collect payments

INCREASE BILLING EFFICIENCY WITH ADDITIONAL FEATURES FROM eBILLINGHUB

As a valued eBillingHub® client, you are already reaping the benefits of its seamless integration with your firm's time and billing system and its ability to transform your e-billing process. Now, available enhancements allow your firm to inject even more eBillingHub functionality into your daily workflow, including:

- Validating time entry further upstream, ensuring that entries are corrected earlier in the billing process
- Integrating real-time status updates with your time and billing system
- Generating custom reports for deeper data analysis
- Delivering verifiable PDF invoices to clients who don't yet support e-billing with the ability to collect on them easily

eBILLINGHUB WEB SERVICES

- Allow IT departments to set up automated "calls" to securely access eBillingHub information
- Populate data from eBillingHub into other systems for monitoring and reporting

With each of the Web Service options, data can be utilized in collection software systems, imported into tables within your time and billing system, integrated into daily emails sent by your IT team, or pulled into any custom report. This instant access to data, coupled with flexibility and convenience, make eBillingHub Web Services worth considering.

YOUR PARTNER FOR E-BILLING SOLUTIONS

Designing the first tool to automate solutions for the law firm e-billing process, eBillingHub has been delivering solutions to hundreds of law firms since 2004. It is now the established leader in simplifying the e-billing process for law firms worldwide.

EBILLINGHUB ENHANCED FUNCTIONALITY

WHICH SOLUTIONS ARE RIGHT FOR YOU?

VALIDATION

The Validation Web Service allows you to submit portions of invoice data to eBillingHub to ensure that it complies with LEDES requirements and your clients' billing guidelines.

Currently, eBillingHub directly supports pre-submission validation of data through ProLaw.

Additionally, eBillingHub helps to support validation during the time entry process by partnering with the following services:

- Intapp Time
- Tikit Carpe Diem
- Bellefield iTimeKeep

INVOICE STATUS

The Invoice Status Web Service allows you to get real-time status updates for your invoices across all supported client vendor services.

Additionally, you also can get basic invoice statistics, including:

- Invoice counts
- Single-invoice histories

eBillingHub also partners with Minisoft to directly integrate this data with their ARCS solution.

REPORTING

The Reporting Web Service provides a comprehensive next-day snapshot of invoice data that can be used to generate custom reports.

These extended statistics include:

- Invoice statuses
- Invoice counts
- Invoice amounts
- Single-invoice histories
- Aging AR invoices
- Rejections and rejection details
- Billing progress details
- Fee earner rates
- Client and extended field mappings

PAYMENT ACCEPTANCE

As an addition to our PDF Invoicing Service, which allows you to track PDF invoices delivered to your clients with the confidence of view tracking, you also can enable the ability to accept payments through a ClientPay collection portal. It's a great supplement for those clients who do not yet support e-billing, and it makes the collections process much easier.
